

LANDRUN™ AND ARCGIS SERVICES

LandRun™ is an optional, fee-based project database developed to collect information in a centralized, online location allowing Coates to generate project documentation and track client deliverables. Our secure, web-based platform provides 24/7 real-time access for project team members allowing any user with access to track the status of a variety of key project metrics.

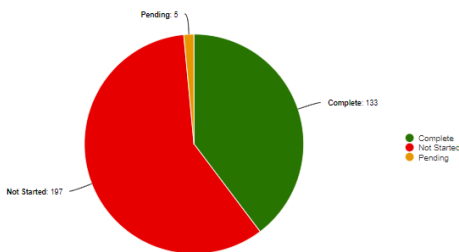

What type of data can you expect to see in LandRun™?

- Live updated GIS layers to visualize critical parcel statuses
- Detailed records related to project scope
- Track progress on activities performed by a third party
- Plus, many more options to choose from!

ROE Status

Acquisition Status

The LandRun™ dashboard is customized based on each client's project needs. Project status is tracked on the home page, and when data changes in the database, it is updated instantly on a map that represents real-time project status displayed in ArcGIS. Once a project is complete, Coates can transfer project information from LandRun™ to the client.
